Marineville Wraps and Cutting Templates

IMPORTANT – Printing

Before printing out all of the models wraps, it is suggested that sheet 'E' is printed out first on its own then measure items -61- Back Wraps to 117mm x 102mm. If the resulting print is different, alter the printing scale/ratio when printing the full set. For instance, if the longer length measures 115mm then divide 117 by 115 x 100 = 102%. (rounded to nearest whole number). If the longer length measures 118mm then divide 117 by 118 x 100 = 99% (rounded to nearest whole number).

NOTE -

Sheets A, B, C and D -

are <u>A3 card cutting guides on A4 Do not stick them onto A4 card.</u> *Print out then mark and cut as shown* ***onto the 3mm thick A3 card****.*

The remainder of sheets are for printing onto A4 paper and are either intended to wrap various card thicknesses or thick paper.

Refer to the main Marineville Build Instructions for wrap positioning and general build methods.
